

Shane Gutierrez has been working, studying and playing with photography for over 30 years. A part of what makes photography so interesting is experimenting with different film cameras. These cameras range from large format, medium format, stereo 3D, lenticular 3D, and the more playful plastic cameras. And of course, there are digital cameras too. His business, Shane Photography, opened shop in 1988 specializing in portraiture, corporate, product and architectural photography. For 17 years he was one of the core instructors for the RISD CE Digital Photography Certificate Program. He also conducts classes at the Barrington Community School, the Wickford Art Association, the South County Art Association, and the Mystic Museum of Art. He has experience as a lecturer, curator and juror and has participated in both solo and group exhibits over the years.
